JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE SUMMER QUARTER

AT

THE UNIVERSITY OF CHICAGO

1915

THE Summer Quarter at the University of Chicago is the most largely attended of the year, nearly four thousand students having registered in the summer of 1914. The University year is divided into quarters: the Autumn, Winter, Spring, and Summer, and students are admitted at the opening of each quarter, and also in certain designated courses at the beginning of the second term of the Summer Quarter.

The courses during the Summer Quarter are the same in character, method, and credit value as in other quarters of the year. Students may enter for either term or both. The quarter will begin on June 21 and end September 3.

A large proportion of the regular Faculty of the University, which numbers about three hundred and fifty, and also many instructors from other institutions offer courses in the Summer Quarter, and in this way many varied points of view are given to students in their chosen fields of study.

ARTS, LITERATURE, AND SCIENCE

The University offers during this quarter, in the Schools of Arts, Literature, and Science, both graduate and undergraduate courses in Philosophy, Psychology, and Education; Political Economy, Political Science, History, Sociology and Anthropology; Household Administration; Semitics; New Testament Literature; Comparative Religion; History of Art, Sanskrit, Greek, and Latin; Modern Languages; Mathematics, Astronomy, Physics, and Chemistry; Geology, Geography, and Paleontology; Botany, Zoölogy, Physiology, Anatomy, Pathology, Hygiene and Bacteriology; Public Speaking; Music.

T h e S u m m e r Q u a r t e r a t

THE PROFESSIONAL SCHOOLS

Education

In the Professional Schools the Graduate Department of Education in the School of Education gives advanced courses in Principles and Theory of Education, Educational Psychology, the Psychology of Retarded and Subnormal Children, History of Education, and Social and Administrative Aspects of Education. The College of Education is a regular college of the University, with all University privileges, and in addition provides the professional training of elementary- and secondary-school teachers and supervisors. It offers undergraduate courses in professional subjects and in the methods of arranging and presenting the various subject-matters which are taken up in the elementary and secondary schools. The University High School, with the fully equipped shops of the Manual Training School, is in session during the Summer Quarter, and opportunity is offered to take beginning courses in Latin and German and to review courses in Mathematics and History. The regular shop work supplemented by discussions of methods is open to teachers pursuing these courses.

Divinity

The Divinity School is open to students of all denominations, and the instruction is intended for ministers, missionaries, theological students, Christian teachers, and others intending to take up some kind of religious work. The English Theological Seminary, which is intended for those without college degrees, is in session only during the Summer Quarter. The Graduate Divinity School is designed primarily for college graduates. Pastors, theological teachers, students in other seminaries, and candidates for the ministry with requisite training are admitted in the Summer Quarter.

Law

In the work of the Law School the method of instruction employed—the study and discussion of cases—is designed to give an effective knowledge of legal principles, and to develop the power of independent legal reasoning. The three-year course of study offered constitutes a thorough preparation for the practice of law in any English-speaking jurisdiction. By means of the quarter system students may be graduated in two and one-fourth calendar years. Regular courses of instruction counting toward a degree are continued through the Summer Quarter. The courses

The University of Chicago

are so arranged that students may take one, two, or three quarters in succession in the summer only, before continuing in a following Autumn Quarter. The summer work offers particular advantages to teachers, to students who wish to do extra work, and to practitioners who desire to study special subjects.

Medicine

Courses in Medicine constituting the first two years of the four-year course in medicine of Rush Medical College are given at the University of Chicago. For the majority of students taking up medical work for the first time, it is of decided advantage to enter with the Summer or the Autumn Quarter. For the student who is lacking in any of the admission courses, or who seeks advanced standing, it is of especial advantage to enter for the Summer Quarter. All the courses offered are open to practitioners of medicine, who may matriculate as unclassified or as graduate students. Practitioners taking this work may attend the clinics at Rush Medical College without charge

Commerce and Administration

The work of the College of Commerce and Administration for the Summer Quarter, 1915, is grouped as follows:

- I. The Trade and Industry Division, where the courses are arranged with reference to the needs of those who expect to engage in the various business pursuits such as accountancy, banking, brokerage, foreign trade, insurance, etc. For purposes of convenience in administration, secretarial work and commercial teaching are classified in this division of the College.
- II. The Charitable and Philanthropic Service Division, for those expecting to serve in charitable organizations, playground work, settlement work, child-welfare agencies, civic organizations, social research, etc.

The University of Chicago is peculiarly fortunate in its environment in summer. The city of Chicago is relatively cool. High temperatures are not frequent nor long continued, and the normal temperature, in comparison with that of other large cities, is low. Reports of the United States Weather Bureau show that the average summer temperature of Chicago is lower than that of most cities of its class. In addition to this advantage in weather conditions, the University has an especially favorable situation in the city. To the south stretches the Midway Plaisance, an avenue of lawn a block wide and a mile long; and about equidistant are Washington Park, a large recreation

The University of Chicago

ground on the west, and Jackson Park, equally spacious, on the shore of Lake Michigan, to the east.

Opportunities for diversion are numerous. In Jackson Park there are golf links, and in both Jackson and Washington parks, lagoons for rowing. There are many tennis courts in both parks, along the Midway, and on the campus. Through the Frank Dickinson Bartlett Gymnasium and the Lexington Gymnasium full facilities for physical culture are given to both men and women. In the Bartlett Gymnasium there is a swimming-pool open daily to men, and at designated hours in the week, to women. The Reynolds Club offers social privileges to men, membership being open to all men in the University. Special attractions at the University are the beautiful William Rainey Harper Memorial Library, with its great reading-room and book collections open to the student, the new Julius Rosenwald Hall, devoted to the Departments of Geology and Geography, the new Classics Building, one of the most artistic academic structures in the country, and the athletic field of the University, with its splendid concrete grandstand seating nearly 10,000 people.

Notable public libraries and museums, highly organized industrial plants, many typical foreign colonies, a large number of settlements, and other significant social institutions make Chicago a peculiarly appropriate center for study and investigation.

A series of public lectures in Literature, History, Sociology, Science, Art, Music, etc., scheduled at late afternoon and evening hours throughout the Summer Quarter, affords an opportunity to students and other members of the University community to hear speakers of authority and distinction in many departments of study and activity. This program will include a number of popular readings and recitals, a series of open-air plays, a series of evening concerts, and excursions to places and institutions of interest in and near Chicago.

The complete ANNOUNCEMENT of courses for the Summer Quarter of 1915 is issued in March, and may be obtained by application to

THE UNIVERSITY OF CHICAGO
CHICAGO, ILLINOIS

William Rainey Harper Memorial Library

The University of Chicago

MITCHELL TOWER

Offers instruction during the Summer Quarter on the same basis as during the other quarters of the academic year. The undergraduate colleges, the graduate schools, and the professional schools provide courses in *Arts, Literature, Science, Commerce and Administration, Law, Medicine, Education, and Divinity*. Instruction is given by regular members of the University staff which is augmented in the summer by appointment of professors and instructors from other institutions.
